

# IT Security & Equipment Policy 2026 — NovaTech Pvt. Ltd.

Document ID: NT-IT-SEC-2026 | Effective: 01 February 2026 | Owner: Information Security

## 1. Device & Equipment Allocation

All permanent employees are issued a company laptop within 3 business days of their joining date.

Engineering and developer roles receive a 16-inch MacBook Pro M3 Max with 64GB RAM and 2TB SSD.

Design roles receive a MacBook Pro 14-inch M3 Pro with 36GB RAM and 512GB SSD.

Operations and administrative roles receive a MacBook Air 15-inch M2 with 16GB RAM and 256GB SSD.

Laptops are refreshed on a 24-month cycle for engineering roles and a 36-month cycle for all other roles.

Lost or stolen devices must be reported to IT Security within 2 hours via the incident hotline at +91-80-4455-6677.

## 2. Password & Authentication Policy

All corporate passwords must be at least 16 characters and include uppercase letters, lowercase letters, numbers, and a special character.

Passwords must be changed every 90 days. Password reuse is prohibited for the last 12 cycles.

Multi-Factor Authentication (MFA) using Google Authenticator or a hardware YubiKey token is mandatory for all corporate accounts.

Hardware YubiKey tokens are strictly required for all AWS console access, GitHub Enterprise, and Supabase production access.

Single Sign-On (SSO) via Okta is the only approved authentication method for third-party SaaS applications.

Sharing of corporate credentials with any third party, including contractors, is strictly prohibited and subject to immediate disciplinary action.

## 3. Network & VPN Usage

The use of the company VPN (NovaTech Secure Connect) is mandatory when accessing any internal resources or cloud infrastructure from outside company premises.

Employees must not connect to public or untrusted Wi-Fi networks without an active VPN session.

All corporate traffic is routed through a Zero Trust Network Architecture (ZTNA) and monitored for anomalies 24/7.

Personal devices (BYOD) may only connect to the isolated Guest Wi-Fi network and not to the corporate LAN or VPN.

## 4. Data Classification & Handling

Data is classified into four tiers: Public, Internal, Confidential, and Restricted.

Confidential data (e.g. source code, financial reports, customer PII) must never be stored on personal devices, personal cloud accounts, or USB drives.

Restricted data (e.g. executive board communications, cryptographic keys, M&A; data) requires explicit CISO approval before any sharing.

All confidential and restricted data at rest must be encrypted using AES-256 encryption.

Accidental data exposure must be reported to the Data Protection Officer (DPO) at [dpo@novatech.in](mailto:dpo@novatech.in) within 1 hour of discovery.

## 5. Software & Application Policy

Only software from the approved NovaTech Software Catalogue may be installed on company-issued devices.

The approved catalogue is maintained at [it.novatech.internal/software-catalogue](http://it.novatech.internal/software-catalogue).

Requests for unlisted software must be submitted to IT via the ticketing system and approved within 5 business days.

The installation of cryptocurrency mining software, remote access tools (other than those approved by IT), or peer-to-peer sharing applications is strictly prohibited and may result in immediate termination.

Browser extensions must be approved by IT Security before installation on corporate browsers.

## 6. Incident Response

All suspected security incidents (phishing, malware, unauthorized access) must be reported immediately via [it-security@novatech.in](mailto:it-security@novatech.in) or via Slack [#security-incidents](#).

IT Security will acknowledge all reports within 30 minutes during business hours and 2 hours outside business hours.

Employees must not attempt to remediate a security incident independently without guidance from the IT Security team.

The IT Security team conducts mandatory annual cybersecurity training for all employees. Non-completion by the training deadline results in temporary suspension of VPN and cloud console access.
